American Can directors to take action on the back dividend on the preferred stock, legal obstructions in the way of concluding the subway negotiations and unfavorable reports of conditions in the copper trade were responsible for declines in the stocks directly concerned, and the heaviness in these shares spread to the general list, although the railroad stocks for a time resisted the movement. But bear traders, although professing increased confidence, did not put their faith to the test by venturing upon heavy operations. The amount of business continued small and the movement among the bulk of the standard issues was narrow. Some of the specialties and a few of the high grade railroad stocks at times were lowered a point or more, giving the market as a whole a heavy tone.

The copper group was the weak feature, these shares being sold on the break in the metal market in London and reports of unsettled conditions in the market. Consumers were said to be holding back, pending publication this week of the copper producers monthly statement. It was predicted that the statement would show a further gain in stocks on hand.
